Introduction

ALTSIGNALS

**Welcome to AltSignals.
In this document, we will introduce
who we are, what we do, why we
created the AltAlgo™ indicator,
and how we engage with our
community to pursue continuous
development and growth.**

What is AltSignals?

Established in 2017, AltSignals is a market leader in providing signals and developing algorithm-based indicators. Born amidst the rapid development on the cryptocurrency markets, AltSignals offers trading signals indicators across crypto and Binance futures, as well as Forex, CFD and shares.

Over the past five years, we have built trusted relationships with customers all over the world who use our products on a daily basis. To back up our business and user satisfaction, we have almost 500 excellent reviews on Trustpilot, with an average score of 4.9/5.

A pivotal business moment for AltSignals was the development was the AltAlgo™, an advanced and fully customizable indicator that makes your trading journey profitable, exciting and effective.

How we built the AltAlgo™

We wrote a script that, despite its complexity, was straightforward from the user's side. It had one parameter to determine signal sensitivity and some essential other settings related to defining take profit levels, stop loss, and visual settings. At this stage, AltAlgo™ users could only use it for manual trading.

Later on, we updated the script, fulfilling our users' wishes of making the AltAlgo™ fully compliant with auto-trading systems like Cornix.

A positive reception

Interest in the AltAlgo™ exceeded even our own expectations. We received a lot of positive messages and feedback from the community as we developed the algorithm with many additional options and filters, with some changes requested by our own users. This resulted in us building one of the most advanced products on the market.

The excellent reception of our algorithm encouraged us to allocate more resources to its development. Due to continuous development and improvement, AltAlgo™ became what it is today.

Why we created the AltAlgo™

At the turn of 2021, we noticed AltSignals users' great interest in scalping indicators. Everyone wanted to enter and exit the market quickly. They needed the right tool for this.

In response to this demand, we devoted several months of hard work and created the first version of our AltAlgo™ script.

AltAlgo™ is a one-of-a-kind signal indicator that was first released in March 2021. We knew that this part of our business would be crucial for the AltSignals brand in the future.

Blockchain

The AltSignals \$ASI token operates on the Ethereum Network. This allows for low-cost token purchases through a secured blockchain. The Ethereum network also enables the \$ASI token to be purchased through our DEX during presale and on various exchanges, such as Uniswap, once the token goes live.

1.0 What is the \$ASI token

Token Benefits

1.0 Trade

Upon launch, you'll have the chance to participate in trading the \$ASI token – something that we are all passionate about.

The Alt Signals Innovation Group

You can now earn \$ASI tokens by working with us to optimize your trading experience and support the improvements of Alt Signals products.

By participating in the AltSignals Innovation Group program, you will receive exclusive beta access to all new releases, giving you a competitive advantage in the market. You will be able to play an active role in the development of current and upcoming products at AltSignals. It is an opportunity not just to be a customer but also a collaborator who can shape the future of the product and the trading signals industry as a whole.

Prize Draws / Trading Tournaments

Being traders, we understand the importance of adding an element of fun and excitement to the trading experience. That's why we regularly host engaging competitions, trading tournaments, and prize draws. These events not only increase the excitement but also provide an opportunity to reward top performers with valuable prizes and \$ASI tokens.

Exclusive Pre/Private Sale Access

Holding \$ASI tokens will give active investors and speculators a significant advantage, as AltSignals community members will receive priority access to private and presale opportunities in the crypto market, positioning them to capitalize on the next bull run.

Governance

Engaging with \$ASI token holders will be an important aspect of the AltSignals decision-making process. It will allow the community to help make key decisions regarding our products, team and future development as Alt Signals continues to grow and evolve.

Additionally, as we expand and build our team, we anticipate making key hires from within the community. Holding \$ASI tokens will allow you to apply for these opportunities and potentially be voted in. By giving \$ASI holders a direct say in important decisions and opportunities, we can create a more engaged and invested community, resulting in a win-win for all parties involved.

2.0 Revenue

Business Revenues

2.0

The trading signals market is exploding and AltSignals has led the charge with impressive sales and product development since its inception in 2017.

We will sustain and grow the business through the following revenue streams:

New Customer Acquisition

Expanding capabilities and product lines to existing and new customers

Affiliate Marketing

White-label opportunities

The number of revenue streams will continue to expand as the product roadmap is delivered and we explore more opportunities in the trading signal space and further afield.

3.0 Roadmap

Product Roadmap

3.0

The AltSignals team has worked to produce a fully transparent roadmap that aims to deliver the best experience for the community and provide value for token holders. This roadmap will develop over time as we look to build the best combined trading and community experience in the industry.

Q1 2023 Presale

- Presale launch of the Alt Signals token
- Release website, White Paper and tokenomics
- Rebrand Website
- Expand existing team
- Team KYC
- Solid Proof - Full Security and smart contract Audit
- Introduce the Alt Signals team to the community
- Launch the Alt Signals Innovation Group

Q2 2023

Q2 2023 Presale

- Token launch
- Token listing on Uniswap
- Release automation for the best performing signal
- 1st Bounty Project for the Alt Signals Innovation Group
- Private Sale Opportunity for \$ASI Holders
- Token listing on CoinGecko & CoinMarketCap

Q3 2023 Presale

- Develop & release further automations across Alt Signal products
- Launch Cross-Chain Bridge (Rubics)
- Second Bounty Project for the Alt Signals Innovation Group
- Integrate and launch our own exchange within the Alt Signals platform
- Private Sale Opportunity for \$ASI Holders
- Start CEX Listing process with 3-5 leading names

Q4 2023 Presale

- Introduction of prop trading to the Alt Signals Platform
- Expand assets and markets for all automated signals
- 3rd Bounty Project for the Alt Signals Innovation Group
- Private Sale Opportunity for \$ASI Holders

4.0 Tokenomics

Tokenomics

4.0

The AltSignals community love trading and succeeding every day in the markets. The tokenomics will always focus on rewarding community contribution and give exclusive access to new opportunities just for holding the token and supporting the business.

Accounting and Value Transfer

\$ASI is the central unit of account and value transfer between the various stakeholders within the AltSignals community.

Holding in wallet

\$ASI can be used to secure a place on whitelists for up and coming private sales of new projects who have partnered with AltSignals.

Win Transactions

Token holders will be able to win \$ASI tokens in prize draws and trading tournaments set up by the AltSignals Team.

Reward Transactions

Community members will be rewarded with the \$ASI token for joining the AltSignals Innovation Group and contributing to bounty projects, including product development, testing and roadmap conversations.

4.1 Tokenomics

Token Supply

4.1

In total there will be a fixed supply of 500 million \$ASI tokens. 50 percent of these tokens (250,000,000) will be made available for the presale event and these will be released in four stages. Once the presale is complete the token allocation will be as follows:

20% (100 Million)

Tokens will be available for product development and the innovation group.

10% (50 Million)

Will be used for Liquidity provision for Decentralised Exchange listings.

20% (100 Million)

Will be used for Marketing and listings on Centralised Exchanges

Burn/Buy Back Mechanism

Once the \$ASI token is live and in circulation, we will introduce a token-burning mechanism or a buyback strategy. Token burns result in tokens being permanently pulled out of circulation over time, thus lowering the overall circulating supply.

Token buybacks allow the protocol to reduce the token supply in circulation should the community feel it is a productive measure at the chosen moment. An excellent example of why we would buy back the token is to provide bounties for the AltSignals Innovation Group and create upward pressure in the market.

5.0 Security

Security Mechanisms

5.0

In order to achieve maximum security for AltSignals and its stakeholders, we will be completely transparent with all actions and token transactions made by AltSignals. We are working closely with a trusted and renowned third-party auditor to ensure the highest level of security, transparency and professional standards are maintained at all times.

Multi-Signature Wallets

Multi-signature wallets are another way we maintain safety and security of all assets under management. This is a risk-management mechanism we have implemented. Alt Signal's treasury assets are to be managed by multiple keyholders. Two or more private key signatures are required to send transactions. This will ensure maintenance of the security and integrity of the treasury function.

6.0 Team

Team

Rod

CEO

With a drive to continuously improve trading services, Rod has been leading AltSignals operations since 2018.

His focus has been on product development, working tirelessly to upgrade the AltAlgo™ proprietary algorithm and manage staff.

Bartos

Head Developer

MrCode AKA Bartos is the head Pine Script developer and joined the AltSignals team in 2021.

His role is to manage the code and scripts, as well as keep the indicators updated with the latest market conditions and technologies.

JC

Analyst

Responsible for maintaining all AltAlgo™ channels and providing technical AltAlgo™ support, JC is the main analyst at AltSignals.

He also manages side projects in developing and improving tools and indicators. To help new users find their way, JC builds video documentation.

Jordan

Marketing

Head of financial conduct and admin, Jordan is the reason AltSignals is known for its top notch support.

She can answer any questions you have relating to AltSignals, especially about signing up and using the services.
